Commercial & Residential

Existing Countertop Removal & Haul Away

Stonecraft Industries Inc. understands that the removal and disposal of existing countertops are often necessary when installing new ones. We offer removal and haul-away services to facilitate the installation process and ensure a seamless transition to your new countertops.

Revitalize Existing Stone Counter

At StoneCraft Industries Inc., we specialize in restoring the luster and beauty of your existing stone countertops. Our team of experts are skilled at evaluating the condition of your countertops and recommending the necessary steps to rejuvenate their appearance. This may include meticulous polishing, thorough resealing, and expert repairs to address any damages or imperfections, such as chips, scratches, or stains. We do work with advanced sealers that act as a shield against common issues like stains and moisture damage, effectively prolonging the life span of your countertops while preserving their exquisite beauty.

Stonecraft's Step-by-Step Procedure Guide

Welcome! When you contact **Stonecraft Industries Inc.**, you will have the opportunity to look at various countertop materials and design options. Here is how we'll make the process nice and easy !

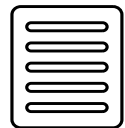

Consultation

Our initial step involves scheduling a site visit to assess your project. During this visit, we'll provide color material samples to help you envision how the stone complements your cabinetry. We'll also discuss the project's execution and estimated timeline. Following the site visit, we'll take you to one of our trusted Distributor Partners to select the perfect slab for your project.

Once you've selected the materials that best fit your space, we'll collaborate with your kitchen and bath dealer to generate a personalized project estimate. After your review and approval, you'll sign a contract that secures your materials, production schedule, and installation timeline.

Agreement

Template

After reaching an agreement, we'll schedule a visit to Laser Map your kitchen or bath. We use a precise and advanced technology called "Digital Laser Templating". It offers many benefits to designers, architects, and clients, allowing them to visualize the final details and make informed decisions.

The template is digitized and fine-tuned for precision. Your selected material is then precision-cut using state-of-the-art technology to achieve exceptional detail and accuracy.

After cutting, the material undergoes edging, polishing, and a thorough quality check.

Fabrication

Installation

The day you've been anticipating is finally here! Our experienced installation team will arrive at your home at the scheduled time to professionally install your countertops. During the installation, they will also provide important information on how to care for your new surface."

Satisfaction

At **Stonecraft Industries Inc.**, we take great pride in our commitment to 100% customer satisfaction. Our dedicated team is here to provide each client with our undivided attention and our knowledgeable staff is always ready to bring your design vision to life. We truly value your feedback and look forward to the opportunity of serving you again in the future.

Frequently Asked Questions - FAQ

Installing stone countertops can be a significant investment and an important decision for your home. Here are some frequently asked questions regarding stone counter installation to help you make informed decisions and understand the process better !

How long does the countertop installation take ?

The duration of countertop installation can vary depending on factors such as the size of the project, the type of countertop material, and the complexity of the installation. Generally, it can take anywhere from a few hours to a few days to complete.

Can I install the countertops myself, or should I hire a professional ?

While it's possible to install some types of countertops yourself, it's generally recommended to hire a professional installer, especially for more complex or expensive materials like granite or quartz. Professional installers have the necessary tools, expertise, and experience to ensure a proper and secure installation.

What should I consider when choosing a countertop material ?

When selecting a countertop material, factors to consider include durability, maintenance requirements, appearance, cost, and suitability for your specific needs. Common options include Granite, Marble & Engineered Quartz. Each material has its own pros and cons, so it's important to research and choose one that aligns with your preferences and lifestyle.

Do I need to prepare anything before the countertop installation ?

Yes, there are a few steps you can take to prepare for the countertop installation. Clear out the contents of your existing countertops and remove any appliances or items that may hinder the installation process. Ensure the area is clean and accessible for the installers. Specific requirements or instructions will be explained on site to ensure a smooth installation process.

How should I care for my new countertops ?

The care and maintenance requirements for countertops vary depending on the material. It's best to follow the manufacturer's instructions for cleaning and maintenance. Generally, you should avoid using harsh chemicals, abrasive cleaners, or cutting directly on the surface. Use trivets or hot pads for hot items and consider sealing certain materials periodically.

Can I reuse my existing sink with new countertops ?...

In some cases, it's possible to reuse an existing sink with new countertops. However, it depends on the compatibility of the sink with the new countertop material and the installation process. Consult with your countertop installer to determine if your existing sink can be reused or if a new one is recommended.
